

INDUSTRIAL KEYBOARDS

MODEL: 5000-DU

Features and Benefits:

- **NEMA 4, 4X rating** - suitable for washdown areas and non-corrosive.
- **119 keys** - standard IBM 101 keys plus an extra row of function keys.
- **Standard size keys** - 1/2" wide with 3/4" spacing
- **24 function keys** - F13-F24 are software specific programmable keys. The software has to allow for these keys to be programmed.
- **HulaPoint™ technology** - the Fujitsu sensor is a button-type joystick with 360° movement on a 10° rotation. This gives you an increased level of movement and control. The HulaPoint™ has 3 buttons - left click, right click, and a third programmable button (if using our driver). Third button is also used on a UNIX operating system.
- **Mounting holes** on back for use in mobile applications.
- **ABS Polycarbonate Plastic Case** - for durability and lower cost.

Cable Connections:

- **"Y" cable** - comes out of unit one cable, then split into 2 for the keyboard and the mouse
- **Standard AT**, serial with PS/2 adapter
- **PS/2** (when ordering PS/2 cables, the part number becomes DU-5K-PS2)
- Beginning 1st quarter 2001, we will be shipping PS/2 cables standard, with an AT adapter.

Low Profile Keys:

- Have the look and feel of a laptop keyboard
- **Easier to type on** - no more problems with keys sticking
- **More tear resistant** - longer durability
- **Easier to clean** - no corners and crevices

Additional Info:

- **Dimensions** - 15.0" x 6.5" x 1.5"
- **Shipping Weight** - 5 lbs
- **Warranty** - 1 year
