SHHHHH! ...STEALTH INTRODUCES SMALL QUIET FANLESS PC A BREAK THROUGH IN EMBEDDED MICRO COMPUTING

Toronto ~ August 21 2003 – Stealth Computer Corporation a leading ISO 9001 manufacturer of specialized computers and peripherals have continued their tradition of providing powerful solutions for space-confined applications. Stealth has introduced the Model LPC-301FL, a breakthrough in micro computing by providing a fanless noise free computer system. Thanks to the rugged design, compact dimensions, and high functionality, the LPC-301FL is excellent for Embedded Control, Digital Signs, Interactive Kiosks, Thin-Clients, and Human/Machine Interface applications. It is one of the smallest full-featured personal computers available anywhere. The LittlePC products serve a demanding market where powerful solutions are being deployed in space-challenged applications around the world

The robust aluminum chassis measures only 10" x 5.7" x 2.8" (about the size of a hard cover novel) in size making it ideal for deploying in space challenged applications. The Stealth LPC-301FL LittlePC has been designed without cooling fans as the rugged extruded aluminum chassis acts as a heat sink to dissipate internal heat and provide noise free operation. The LPC-301FL features an Intel ULV Pentium-III 400MHz processor that provides for optimal heat dissipation and power consumption. A multitude of I/O connectivity is built-in such as; LAN, Serial, Parallel, 3-USB, FireWire, VGA, PS/2 Mouse & Keyboard ports. The LPC-301FL has a built-in 2.5" high-shock hard drive with up to 60GB's of storage space for archived data. For applications that require extra high shock/vibration an optional Solid State Hard Drive or Flash Drive is available. A slim CD-Rom comes standard with optional DVD and CD/RW drives available. Systems are compatible with WIN 9X/NT/2000/XP, Linux etc and can be pre-configured if desired.

Founded in 1990 Stealth Computer Corporation is quietly evolving as a leading provider of specialized Computers and Peripherals. The company is ISO9001 registered with its headquarters near Toronto, Canada. Stealth continually develops innovative products designed to meet the exact needs of their clients. For over a decade Stealth products have been used in industrial, commercial, scientific, Government and military applications. Stealth Computer Corporations impressive customer base includes Fortune 500 companies, Military installations and Governments worldwide.
