STEALTH COMPUTER CORPORATION IS AWARDED PRODUCT OF THE YEAR FOR BRIGHT LCD MONITOR PRODUCT

Toronto ~ June 2003 – Stealth Computer Corporation announced that readers of *Plant Engineering Magazine* have voted the StealthVU High Brightness LCD Monitor a Gold winner in the 2002 Plant Engineering Product of the Year Awards competition. The 15th annual competition recognizes major new products across 15 categories, including Control Equipment, Electrical Power, and Instruments etc. A panel of plant engineers screens initial entries and then readers are invited to vote on their choices for the best overall products. Award winners were honored recently at the 2003 National Plant Engineering & Management Show black-tie awards reception in Chicago.

Stealth's High Brightness LCD earned the first place Gold Award in the Control Equipment category. The StealthVU-HB industrial grade monitors are extreme brightness sunlight readable LCD's that are designed to operate in high ambient light conditions. StealthVU-HB monitors outperform commercially available products that wash out in direct and indirect sunlight conditions.

"Winning the first place gold award is an honor as the judges are industry professionals who face the day-to-day challenges of staying competitive in various manufacturing industries," said Ed Boutilier, President & CEO of Stealth Computer. This award is a significant accomplishment of which we are exceptionally proud.

About Plant Engineering (Reed Business)

Since its first issue in 1947, *PLANT ENGINEERING* has stood as the leading problem-solving information source for America's industrial plant engineers.
