Stealth achieves ISO 9001:2000 Quality Certification

Leading Industrial Computer & Peripherals Company enhances international competitive edge and ensures customer satisfaction and operational excellence through Quality Management System

Toronto – March 15, 2002 - Stealth Computer Corporation today announced it has received a registration certificate as an International Standards Organization, (ISO) ISO9001:2000 company. This confirms that Stealth processes and business practices adhere to the most stringent quality control standards observed around the world. According to Stealth's President, Ed Boutilier; "this certification reaffirms Stealth's commitment to pursue product innovation, customer satisfaction and operational excellence while strengthening our international market position as a leading manufacturer of specialized computers and peripherals".

Stealth's ISO9001 certification will enhance its relationships with international corporations, which increasingly require their partners and suppliers to be ISO certified. Stealth's ISO 9001 certification also increases its competitive edge in the U.S. government marketplace since a growing number of agencies can qualify their contractors through a Quality Management System such as ISO9001. Stealth supplies specialized computers and peripherals to government agencies including the U.S. Armed Forces, NATO, the Federal Aviation Agency (FAA), and NASA. Its products are used in Aerospace, Telecommunications, Test & Measurement, Process Control and shop floor applications.

Certification to the prestigious ISO9001:2000 standard requires a comprehensive assessment and audit ensuring that the company maintains the proper procedures and processes for a complete quality system. Only after stringent third-party assessment can the ISO registration be received. Thereafter annual audits are conducted to ensure that the quality system is being correctly applied, maintained and improved. Stealth is audited by the Quality Management Institute (QMI) of Mississauga, ON. www.qmi.ca

About Stealth

About ISO

The International Organization for Standardization (ISO) is a worldwide federation of national standards bodies from some 140 countries, one from each country. ISO is a non-governmental organization established in 1947. The mission of ISO is to promote the development of standardization and related activities in the world with a view to facilitating the international exchange of goods and services, and to developing cooperation in the spheres of intellectual, scientific, technological and economic activity. www.iso.org
